

Dionis Ludovick Nasuwa

BSc. Computer Science · CoICT, University of Dar es Salaam (Expected October 2026)

Dar es Salaam, Tanzania | nasuwadio36@gmail.com | +255 719 231 593 (WhatsApp) / +255 754 794 174 | linkedin.com/in/dionis-nasuwa | github.com/dionis36

PROFESSIONAL SUMMARY

Motivated Computer Science graduate from UDSM (CoICT) with strong analytical problem-solving capabilities, full-stack software expertise, and IT infrastructure management experience. Certified in Full Stack Open (University of Helsinki, Grade 5/5) and Scrum Fundamentals (SFC™). Experienced in building secure web systems, managing network infrastructure, and applying agile methodologies. Driven to leverage technology, systems architecture, and data-driven insights to advance digital banking transformation, operational efficiency, and financial inclusion within the Mwanga Hakika Bank (MHB) Next Gen Programme.

EDUCATION & PROFESSIONAL CERTIFICATIONS

Bachelor of Science in Computer Science | College of Information & Communication Technology (CoICT), UDSM (Expected October 2026)

- Full Stack Open Certification — University of Helsinki (July 2026):** Achieved Maximum Grade (5/5) covering deep React, Redux, Node.js, REST APIs, GraphQL, and secure web application architecture.
- Scrum Fundamentals Certified (SFC™) — SCRUMstudy (July 2026):** Validated expertise in Agile project management, sprint planning, cross-functional execution, and iterative product delivery.

PROFESSIONAL & TECHNICAL EXPERIENCE

Software Engineering Collaborator | Mainstream Group (Technology Division) March 2026 – May 2026

- Contributed to enterprise software development and system architecture design across multi-module applications.
- Engineered secure RESTful API integrations and backend data flows, enhancing system interoperability and processing speed.
- Engaged in Agile workflows, sprint reviews, and cross-functional team alignment to deliver project milestones reliably.

Software Development Trainee | UDICTI / StartHub Africa Partnership July 2025 – September 2025

- Collaborated on full-stack application development and UI layout design for the 'Smart Cargo' digital logistics management system.
- Mapped complex user workflows into intuitive interfaces, optimizing user navigation and real-time transaction tracking.
- Assisted in workflow testing and database query optimization to improve data transparency and reporting accuracy.

IT Infrastructure & Network Optimization Trainee | TPC Limited July 2024 – September 2024

- Upgraded network switches, deployed routers, and set static IP bindings to optimize enterprise network uptime and secure routing.
- Diagnosed and resolved hardware/software maintenance issues across business-critical desktop terminals and network peripherals.
- Enforced endpoint network configuration standards to ensure operational continuity across enterprise departments.

KEY TECHNICAL & SYSTEMS PROJECTS

Plaque Platform — Web Architecture & Analytics (TypeScript, Node.js, React, Docker, Fly.io, Vercel)

- Architected a TypeScript monorepo delivering digital connectivity tools with real-time analytics and secure authentication layers.
- Configured automated CI/CD deployment pipelines (Fly.io/Vercel) with Nginx reverse proxying for high service availability.

Strata (Final Year Project) — Codebase Visualization Utility (Python, Streamlit, Docker, AST/DAG Parsing)

- Engineered an analytical utility parsing complex codebases into Abstract Syntax Trees (ASTs) and Directed Acyclic Graphs (DAGs).
- Built interactive visual dashboards enabling system architects to audit structural dependencies and optimize codebase maintainability.

TECHNICAL SKILLS & CORE COMPETENCIES

Programming & Web: Python, TypeScript, JavaScript, PHP, SQL, Dart, React, Next.js, Node.js, Express, Streamlit

Databases & Cloud: MySQL, PostgreSQL, Supabase, Redis, Git, Docker, Fly.io, Vercel, Nginx, SSH, REST APIs

Networking & Infra: LAN Setup, Static IP Binding, Switch Deployment, Network Troubleshooting, Hardware Maintenance

Frameworks & Methods: Agile/Scrum (SFC™), Monorepo Architecture, CI/CD Pipelines, Systems Analysis, Data Analytics

Languages: Swahili (Native) | English (Fluent)
